Bullying

Bullying is a problem for a lot of people, and I used to have friends who were bullied by other people. Bullying is not a good thing to do to people because their hearts will be broken, and they won't feel comfortable. Also, when people are bullied, some of them feel like they want to kill themselves. They don't want to talk to anybody. People who are bullied should talk to somebody, and explain what happened to them. There was a girl I talked to in the 5th grade, and she told me that there were a lot of kids bullying her. They said a lot of bad things to her.
