

Homelessness

Homelessness is a condition suffered by people who do not have a home or shelter. They do not have a home to sleep in and a place where their family can live in. They do not have shelter, food, and water. They are very poor, and they need help. Many sleep on the ground.

Do you care about homeless people? I do. There are a lot of people that are homeless, but there are shelters for these people. I don't know why they don't go to the shelter. The shelter is there to help them maintain themselves. This way, they can find a job and make money so they can have a good start. They should make more shelters for the homeless people and children.

Homelessness can be caused by unemployment. We should give homeless people jobs so they can have their own money by earning. This would help them by working and saving up for food, water, clothes, a house or an apartment. If people would give the homeless a job, this would be good for them. They can have money in their pocket so they don't have to ask people for money anymore. There are also homeless children out there. This is sad because they are starving for food, and they don't have anywhere to sleep but on the ground.

There are shelters out there for homeless people to stay in and sleep there, too. We should stop people from being homeless. We need to change this. We can make this change by giving them a job and therapy, if they need it. We can send them to the shelters. There are a lot of things that we can do to help people from being homeless.
