

## Homelessness

Homelessness is a situation where a person has no home and no money. These people are not living normally. I feel bad knowing there are people in America with no home, nothing. This makes our country look bad because America is a place where you find jobs and everything. But some people have nothing. We, the people need to stand up, and help the homeless, our country.

We need to let them know there are still kind people living in this world. We need to fight for these people living in the streets. This is a big problem all over the world because more and more people are becoming poor, and living with no homes. Even little children are out there begging for money. This crosses the line. What we can do to stop homelessness in America is to go into the streets with signs saying, "Stop homelessness, help!" We can start building a giant apartment building where the homeless can live, eat and feel safe. We need to do something about this situation, we cannot have these people dying in our streets.
