

## Homelessness

Homeless people suffer a lot, and when I see people in the streets with a poster saying, “HOMELESS AND HUNGRY, PLEASE HELP!” I get sad because they don’t have anything to eat. Every day they stand in one place in the street to beg for money. Sometimes, they just get a little bit because some people think that they just want it for beer or liquor.

Also, it is sad that moms with little children are homeless. They don’t have a place to sleep, so they sleep on the ground where there are germs and other things. The children can get sick because they eat things from the streets or things they find in the garbage. This is nasty. They shouldn’t eat like this because it is going to cause more problems for them.

We should make places to stay so homeless people can live safely. It is really sad to be in the streets begging for money. When I see them, I start thinking about how their life is. The homeless will be so thankful for us giving them a home.
