

You can stop homelessness by helping them or give them some food so they could survive. There are a lot of homeless people out there that need help. So when you pass by, don't just ignore them, help them out. They are people too. They are not different from us.

*Homelessness*

**Stop  
Homelessness!**

## What is homelessness?

Homelessness means that a person has no home and is living on the streets with no food. He has to beg for money or food. Some people just walk by when the homeless person asks them if they have any spare change or something to eat. They keep on walking without saying anything. Homeless people walk around downtown just with socks on or barefoot, sometimes in torn up tennis shoes. Some wear badly torn up looking cloths. Some try to get in shelters, but most shelters are overflowing with homeless people, so most of them stay on the streets with sleeping bags, bus or train stations, airports and hospital lobbies.

## Stop homelessness

To stop homelessness we need to stop the big banks from writing mortgages that people can't afford. We need to make affordable housing for people that don't have a large income. We need to build more shelters that are clean and safe for when people have no other place to go. Or in your spare time you could help them by giving them some food or money.

## What causes homelessness?

How do you end up on the streets? One way you get homeless... money! A job is maybe not enough to pay for basic needs like rent, food, and clothes. Some of the people have families. What happens if they can't pay for rent? That may be the saddest thing to tell your family.
